

27TH EDITION · DAY FOUR

FOGG Fashion Company by Nizar

FOGG Fashion Company by Nizar brings fluid shimmer to BFW Day Four

At the 27th edition of Bangalore Fashion Week, FOGG Fashion Company by Nizar presented a sequence of evening looks in metallic neutrals, soft gold and taupe. Sheer drapes, sequined surfaces and flowing skirts shaped a collection with a light, luminous finish.

BENGALURU, 18 OCTOBER 2026 — FOGG Fashion Company by Nizar marked Day Four of the 27th edition of Bangalore Fashion Week with a collection built around fluid movement and surface richness. The looks stayed within a restrained palette of silver, champagne, taupe and muted gold, allowing texture and cut to carry the visual weight.

Across the showcase, fitted bodices gave way to long, sweeping skirts in layered fabrics that caught the runway light. Embellished corsetry, delicate beading and fine sequin work created a dense shimmer across the torso, while the lower half of each look moved with a softer, more liquid fall.

Sheer capes and cape-like sleeves added a light architectural element to the silhouettes. In one look, a translucent drape extended from the shoulders and trailed behind the body, while another paired a structured embellished bodice with long, flowing panels that framed the arms and softened the outline. The result was a balance between precision and ease.

The collection also played with contrast in texture. Matte or satin-finish skirts sat beneath intricately worked tops, and the interplay between opacity and transparency gave the garments depth. Some looks held a more columnar shape, while others opened into fuller skirts that moved outward from the body with a gentle flare.

Viewed together, the collection carried a polished evening sensibility rooted in restraint rather than excess. The emphasis remained on tonal harmony, surface detail and the quiet drama of movement, creating a mood that was refined, luminous and distinctly occasion-led.
